Sydney, NSW | +61 492 836 152 | [u.sathwik1@gmail.com](mailto:u.sathwik1@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Full Australian work rights (Temporary Graduate Visa, valid to July 2028)

## PROFESSIONAL SUMMARY

Software developer with a Master's in Information Technology (Data Science & Engineering) from UNSW and 15 months of industry experience at Accenture. Strong **SQL** and **Python** background, with hands-on experience writing automation scripts, processing **CSV/JSON** data, working with **REST APIs**, and building reports and dashboards (**Power BI**, **Streamlit**). Used to supporting live systems through UAT, QA, and production deployments, documenting my work, and explaining technical issues to non-technical users. Looking to support and improve business-critical systems and data processes, and to grow my ERP experience on the job.

## EDUCATION

**Master of Information Technology – Data Science & Engineering** | May 2023 – Jun 2025

University of New South Wales (UNSW), Sydney | WAM: 74

**Bachelor of Engineering – Computer Science & Engineering** | Aug 2017 – Jul 2021

Mangalore Institute of Technology & Engineering, India | CGPA: 8.45 / 10

## EXPERIENCE

**Application Development Associate** | Oct 2021 – Jan 2023

**ACCENTURE, INDIA**

- Wrote **Python** automation scripts to process structured **CSV** datasets and manage user access provisioning, cutting manual data-handling effort by **70%** and improving data accuracy.
- Built data validation and transformation utilities for enterprise workflows, and automated regression test suites that lifted test coverage by **40%**.
- Managed UAT, QA, and production deployments using **Docker**, **Kubernetes**, and **Microsoft Azure**, working with engineering and business stakeholders to resolve issues and keep releases on track.
- Tracked work in **JIRA** and wrote technical documentation in **Confluence** so other team members could pick up and support the systems.
- **Bravo Level Recognition** from Accenture leadership for contributions to delivery quality and defect reduction.

## TECHNICAL SKILLS

- **Databases & SQL:** SQL (queries, joins, window functions, CTEs), PostgreSQL, MySQL, MongoDB Atlas, schema design and data validation
- **Programming & Automation:** Python, Java, JavaScript; scripting and automation of data tasks, batch-style processing, Git
- **Data Integration:** REST APIs, JSON, CSV, ETL pipelines, data import/export, Postman
- **Reporting & BI:** Power BI, Streamlit, Plotly, Matplotlib; KPI and trend reporting
- **Systems & Cloud:** Microsoft Azure, AWS S3, Docker, Kubernetes, CI/CD pipelines
- **Ways of Working:** UAT/QA sign-off, technical documentation (JIRA, Confluence), Agile/Scrum

## PROJECTS

**Sydney Rental Market Intelligence Platform** Feb 2026 – May 2026

*PySpark · Databricks · Delta Lake · AWS S3 · SQL · MLflow · Streamlit*

- Built a data pipeline processing **190,000+ Sydney rental listings** through Bronze/Silver/Gold layers on **Databricks**, with schema enforcement and data-quality checks at each stage.
- Delivered an interactive **Streamlit** dashboard for suburb-level trends and live predictions, and tracked model runs with **MLflow** (**73.7%** prediction accuracy).

**Automatic Quiz Generator — Full-Stack LLM App** Feb 2025 – May 2025

*Flask · REST APIs · LangChain · OpenAI API · MongoDB Atlas · Docker*

- Built an Atlassian Forge app integrated with Confluence using a **Flask REST API** and the **OpenAI API** to generate quizzes, stored data in **MongoDB Atlas**, and deployed it with **Docker** on Render.

## CERTIFICATIONS

- **Databricks Certified Data Engineer Associate** — in progress
- Databricks Fundamentals Accreditation — Databricks Academy (Nov 2025)
- Certified Automation Engineer (Specialist) & Automation Practitioner (Foundation) — Accenture (2022)
