PROFESSIONAL SUMMARY

Sydney-based software and data engineer with a Master's from UNSW and ~15 months of industry experience at Accenture. Builds end-to-end across Python, SQL, Java, and JavaScript/React, with cloud and container experience on Azure, AWS, Docker, and Kubernetes. Recent project work covers a full-stack SaaS application, a Databricks-based data lakehouse, and ML/computer-vision models. Practical exposure to AI-assisted development (LangChain, OpenAI, GitHub Copilot) and CI/CD in Agile teams.

EDUCATION

Master of Information Technology: Data Science and Engineering University of New South Wales WAM: 74.	May 2023 - June 2025
Bachelor of Engineering: Computer Science & Engineering Mangalore Institute of Technology & Engineering CGPA: 8.45.	August 2017 - July 2021

EXPERIENCE

Application Development Associate ACCENTURE INDIA	October 2021 - January 2023
---	-----------------------------

- Executed **functional, non-functional, regression testing, API testing** and performance testing developing **Selenium(Java)**-based automated test suites to accelerate testing cycles and improve coverage by 40%.
- Developed **Python automation scripts** to process CSV data and manage access, reducing manual effort by 70% and improving accuracy.
- Owned UAT, QA, and production deployments, using **Docker** and **Kubernetes** for **QA/UAT** and **Azure for production**, collaborating with engineering and business teams in an Agile environment.
- Tracked tasks and communicated outcomes using **JIRA**, and created technical documentation and presentations for stakeholders.
- Collaborated with business stakeholders and engineering teams to interpret requirements and communicate testing outcomes clearly.
- Bravo Recognition – Accenture:** Awarded Bravo Level Recognition by Accenture leadership for contributions to key project milestones, defect reduction, and overall delivery quality.

SKILLS

- Programming & Scripting:** Python, SQL, Java, JavaScript
- Frontend:** React, Atlassian Forge UI Kit
- AI / AI-Assisted Dev:** LangChain, OpenAI API, prompt engineering, GitHub Copilot, RAG fundamentals, AI/ML concepts
- DevOps & Deployment:** Docker, Kubernetes, Azure, Git, CI/CD pipelines
- Databases:** MongoDB Atlas (NoSQL/Document), SQL (PostgreSQL, MySQL), Delta Lake
- Tools & Collaboration:** JIRA, Confluence, Postman

PROJECTS

Automatic Quiz Generator Github	February 2025 - May 2025
- Built a full-stack Atlassian Forge app integrating with Confluence to auto-generate quizzes using LangChain + OpenAI API, with constraints defined via the frontend. - Implemented MongoDB Atlas for storage, containerized the backend with Docker, and deployed on Render cloud, enabling scalable, automated quiz generation.	
Sydney Rental Market Intelligence Platform	January 2026 - April 2026
- Built data lakehouse platform on Databricks with medallion architecture processing 190,000+ NSW rental records using PySpark, Delta Lake, AWS S3 storage, and Apache Airflow orchestration. - Developed automated ML pipeline with MLflow experiment tracking and XGBoost deployed as interactive Streamlit dashboard delivering rental market insights and price predictions.	

EXTRACURRICULARS AND ACHIEVEMENTS

- Berry-Jam Contest (Jul 2024):** Achieved 11th place in a low-data image classification challenge using augmentation and ensemble.

CERTIFICATIONS

- Certified Automation Engineer (Specialist) - Accenture (Jun 2022).
- Certified Automation Practitioner (Foundation) - Accenture (Mar 2022).
